Subject: Decision on submission to Engineering Structures

Manuscript Number: **ENGSTRUCT-D-25-05223R2**

A digital twin method for real-time analysis of structural deformation and failure for high arch dams

Dear Professor Chen,

I am pleased to inform you that your manuscript has been accepted for publication. Congratulations!

My comments, and any additional reviewer comments, can be found below.

What happens next?

Your accepted manuscript will now be transferred to our production department. We will create a proof of your article and share it with you for your approval. We'll also send you a link to a number of online forms that we kindly ask you to complete at your earliest convenience. If we need any additional information from you during the typesetting process, we will contact you. For further information about the proofing process, please click this link:

Reviewing for Engineering Structures

We regularly invite authors of recently published manuscript to participate in the peer review process. If you were not already part of the journal's reviewer pool, you have now been added to it.

We encourage authors of original research papers to share the research objects – including raw data, methods, protocols, software, hardware and other outputs – associated with their paper. More information on how our open access Research Elements journals can help you do this is available at https://www.elsevier.com/authors/tools-and-resources/research-elements-journals?dgcid=ec_em_research_elements_email.

I look forward to seeing your accepted article published and thank you in advance for your continued support.

Kind regards,
Jie Yang
Lead Editor-in-Chief
Engineering Structures
